FUTBOLTECH

About Us

FutbolTech is an innovative organization that transforms young lives through a unique combination of soccer, education, and technology.

Soccer

Technology ↔ Life Skills

Our Mission

To develop global champions, prepared to succeed both on the field and in the international arena, through the development of soccer, education, and technology skills.

Our Approach

- **Soccer:** High-quality training with innovative methodology.
- **Education:** Promotion of sports and academic scholarships.
- **Technology:** Digital tools to enhance development.

Special Focus: Girls in Soccer

We are committed to increasing opportunities for young girls to thrive on and off the field.

Our Impact: Transforming Lives through Soccer, Education, and Technology

Areas of Influence

English on The Soccer Field:

- **Engaging and Dynamic Learning:**
A unique program that uses soccer as a platform to teach English in a fun and interactive way, making language learning enjoyable and relevant.
- **Practical Vocabulary Development:**
Youth learn introductory English vocabulary and actively practice it during training sessions, seamlessly integrating language into sports.
- **Dedicated Language Activities:**
Each session includes 25 minutes of targeted activities designed to build essential language skills within a sports-focused context.

Support for Soccer Schools:

This program combines sports development, education, and technology to transform the management of youth soccer. It includes the use of digital platforms for tracking and assessment, as well as management tools for coaches and administrators.

Youth Soccer Scholarships:

The FutbolTech scholarship program opens doors for talented youth facing financial barriers, providing access to high-quality soccer training.

In partnership with organizations like AYSO and other allies, FutbolTech offers full and partial scholarships to cover enrollment costs, enabling children from low-income families and single-parent households to participate in the sport.

University Scholarships:

FutbolTech also awards university scholarships in Latin America, empowering young people to pursue higher education and continue developing their skills in an academic environment.

These scholarships not only support academic growth but also prepare youth for a global future, demonstrating FutbolTech's commitment to transforming lives and creating pathways to a brighter future.

Women's Soccer

Opening Paths and Creating Opportunities

Driving Women's Soccer with Innovation

At FutbolTech, we strongly believe in the power of soccer as a tool for social transformation, and we are committed to the development of women's soccer.

Our innovative methodology not only trains exceptional players but also prepares them for a global future.

Women's soccer has experienced significant growth in recent years, offering more and more opportunities for girls and women in Latin America and around the world.

Our Vision for Women's Soccer

We aim to create a space where girls and young women can:

- Develop their soccer skills to the highest level
- Learn English in a dynamic and practical way
- Acquire essential technology skills
- Empower themselves as leaders in sports and in life

Cleat Donation

Get Them Back in the Game

At FutbolTech, we believe every child deserves the chance to shine on the field.

Our "**Get Them Back in the Game**" program was born from a real and urgent need: to provide proper footwear to boys and girls who dream of playing soccer but lack the resources to obtain basic equipment.

Impact

A Pair of Cleats = An Opportunity:

Each donated pair allows a child to fully participate in training and games.

Performance Improvement:

Proper footwear not only prevents injuries but also significantly enhances on-field performance.

Confidence Boost:

Having the right equipment increases self-esteem and motivation for young athletes.

Social Inclusion:

It enables children from low-income families to fully engage in sports activities.

Environmental Impact:

Donating cleats gives this essential piece of gear a second life, reducing waste and promoting recycling.
